

## National Activities Officer – NEC Aug 2019 report

Since the meeting in May things have been a little up and down for me personally with my management company changing. This has meant due to this uncertainty I have not been able to put as much work into the NAO role as I would have liked. This has now recently settled down and I'm looking to focus my efforts a lot more between now and November.

I am looking forward to supporting WASH but due to finances have had to book a caravan off site and then pay for the access charge. I have been able to finally get access to everything I need regarding the Spring Holiday accounts and these have now been finalised, which I will go into more fully on later in the meeting.

I would request that if possible, the areas activities officers, yes that does include me for NTAC area could let me know of upcoming events so that these can be advertised to the wider plus organisation. I am looking to publish something along the lines of a National activities' diary on Mark Hewson's website which has events such as WASH, NAGM and Hoburne listed for ease of access to everyone.

Activities are the things which keep people coming back to Plus, so it would be good to see some more being widely advertised over the next few months
